

Brian Waterhouse

May 9, 2024

Started serving on Council: 2001-08-23

Years served as Councillor: 2001-2020 (except for 2005-2006)

Years served as Mayor: 2005-2006, 2021-2024

Total Length of Service: 23 years

Some of the projects during Brian Waterhouse's time on Council are:

- * The Community Hall upgrade: This project involved adding the Kitchen area and new kitchen appliances to the Community Hall.
- * The Hall expansion: This project involved adding to the Community Hall an administration Office and second meeting room that can also be used as an emergency command center in the event of a disaster at south Pigeon Lake.
- * Construction of a Public Works garage: This project involved building a Public Works garage to provide the public works and volunteer staff a workshop. This facility also houses the Summer Village maintenance equipment and archive files.
- * The playground project: Developing a new playground from gathering community input, sourcing an area, and getting all the equipment installed. The final landscaping included a Clean Runoff Garden designed so users of the park can learn about the features that help this site reduce pollutants and nutrients entering the lake from runoff.
- * The Summer Village emergency escape route: This project was developed to allow secondary routes out of the Summer Village if the main route was blocked during an evacuation. This project involved some brush clearing and the installation of break-away barricades.
- * The Holding Tank inspection project: This project involved inspecting the wastewater plumbing of each residential building to ensure all wastewater from the buildings goes to a holding tank and not a septic field. Also, each holding tank was inspected for leaks using a hydro test method.
- * APLM In-lake Technical Committee review of options to control algae blooms: This project has involved data gathering to analyze the water and sediment characteristics to develop several reports in search for an option to help mitigate the annual algae blooms on Pigeon Lake. This project is on-going.
